Evaluation of Research Report (Reference No. 02/209/2014-15/RP)

I have thoroughly examined the research report entitled "Quality of Health Care: An Investigation into Articulation, Measure, Development and Assessment of Health Service Quality of Government, Charitable and Private Hospitals" submitted by Dr Ekta Duggal to Indian Council of Social Science Research (ICSSR). I have also gone through the research proposal which was submitted by the researcher based on which research grant of Rs. 6 lakh was sanctioned by the ICSSR. My observations after the evaluation of the Research Report are as follows:

1. The researchers have completed the research work strictly in accordance with the research proposal that was submitted by them to the ICSSR and approved for the grant of research project.
2. The objectives of the research have been clearly articulated. The researchers have tried to explore how customers view healthcare service delivery, and based on this development of reliable measure to assess healthcare service experience and to make comparative analysis of patient's experience of various segments of healthcare service providers.
3. The research methodology adopted by the researcher is appropriate and meets the requirements of the objectives of the research. The study is based on both primary as well as secondary data. The research instruments used for the collection of primary data are well designed and the size of the sample is adequate. The analytical techniques used for the analysis and interpretation of data are appropriate and meets the requirements of the research.
4. The researcher has drawn meaningful conclusions based on proper analysis and interpretation of data.
5. The literary presentation of the research report is good. The research report clearly evinces the capability of critical analysis and sound judgment on the part of the researchers. The research outcome is an addition to the existing stream of knowledge and is fit for publication in its original form.

Keeping into consideration of above observations I recommend that this research report entitled "Quality of Health Care: An Investigation into Articulation, Measure, Development and Assessment of Health Service Quality of Government, Charitable and Private Hospitals" submitted by Dr Ekta Duggal be accepted by the ICSSR. I also recommend that publication grant be sanctioned by the ICSSR for the publication of this Research Report.
